Disclaimer

The risk of loss in trading futures contracts or options is substantial. In some circumstances, I may sustain losses in excess of my initial margin funds. Placing contingent orders, such as stop-loss or stop-limit orders, will not necessarily avoid loss. Market conditions may make it impossible to execute such orders. I may be called upon at short notice to deposit additional margin funds. If the required funds are not provided within the prescribed time, my position may be liquidated. I will remain liable for any resulting deficit in my account. I should therefore study and understand futures contracts and options before I trade and carefully consider whether such tradings is suitable in the light of my own financial position and investment objectives. If I trade options I should inform myself of exercise and expiration procedures and my rights and obligations upon exercise or expiry.

This brief statement does not disclose all of the risks and other significant aspects of trading in futures and options. In light of the risks, I should undertake such transactions only if I understand the nature of the contracts (and contractual relationships) into which I
